Date	January 2015 - November 2018
Award	Certificate of Secondary Education (CSEE)

WORKING EXPERIENCE

ORGANIZATION **Ardhi University (July 2023 - September 2023)**

Main responsibilities

- I participated in GeolCT4e Multi-competence learning program (MCL) during my industrial training where I developed a Geospatial-ICT solution which is an IoT Web based system for monitoring Temperature and Air quality on green spaces so as to protect them from disappearing.

PROJECTS WORK

- Studying deeply about umbrella challenge which was unsustainable management of urban green infrastructure and umbrella challenge area which was Kinondoni so as we can come up with the good system thinking and mapping concerning with our umbrella challenge which can help to obtain our actionable problem.
- To come up with our actionable problems from our system thinking and mapping and to present to the mentors and supervisors.
- To come up with marketable Geospatial-ICT solution concerning with our actionable problem.
- Presenting our solution to the mentors, supervisors, stakeholders and our fellow students in order our solution to be validated before the final presentation.
- We had final presentation whereby stakeholders were invited to see our solution which was developed by each group concerning with the umbrella challenge.

OTHER PROJECT (FINAL YEAR PROJECT)

This was done at Ardhi University as a Final Year Project (FYP) which stated "Ardhi University Student's Rides Sharing System". The project was achieved by using both Mobile Application and Web Application whereby Flutter, HTML, CSS and JavaScript were used for front-end development and Laravel were used for back-end development.

HOBBIES

I like more reading books concerning development of Information Technology as I gain more knowledge to know where we are and where we are heading.
